# How to install our Photoshop action packs

Installing our Photoshop actions is easy. Most people will have no problem with the quick installation below, it just takes a few seconds and you're up and running!

Quick installation

1. **Unzip** the Photoshop action pack *.zip* file you downloaded from us.

2. **Find** the file with the *.atn* extension that was included in the *.zip* file.

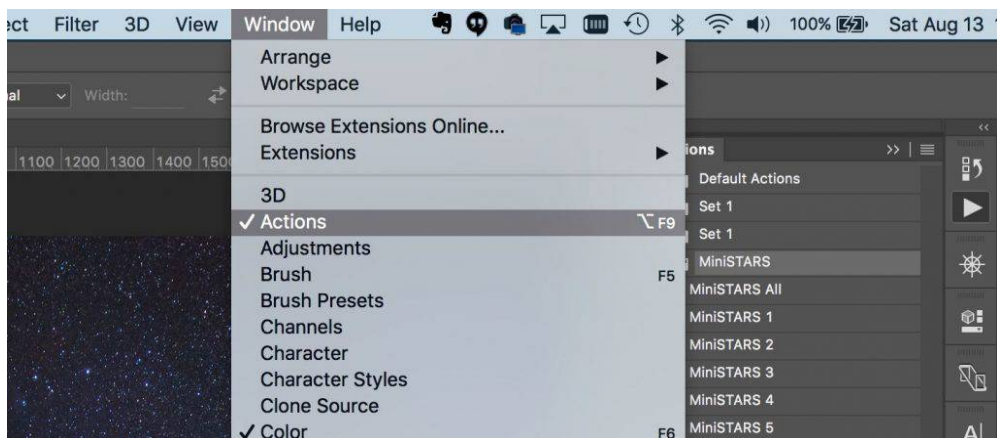

3. **Double-click** the *.atn* file or **open it in Photoshop.**

4. Done! Once Photoshop is opened and running, the action should be installed.

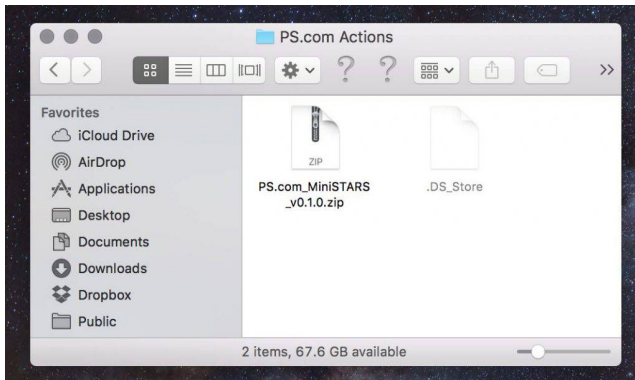

You may need to make sure the *Actions* panel is visible by ensuring *Window->Actions* has a checkmark next to it.
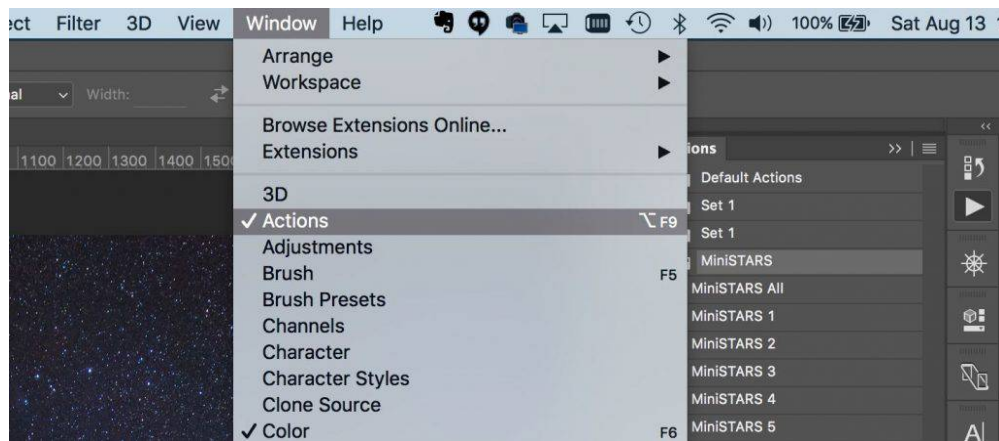

Manual installation

Having trouble with the quick installation? Give this slightly-more manual installation a try, it's also quite easy to do!
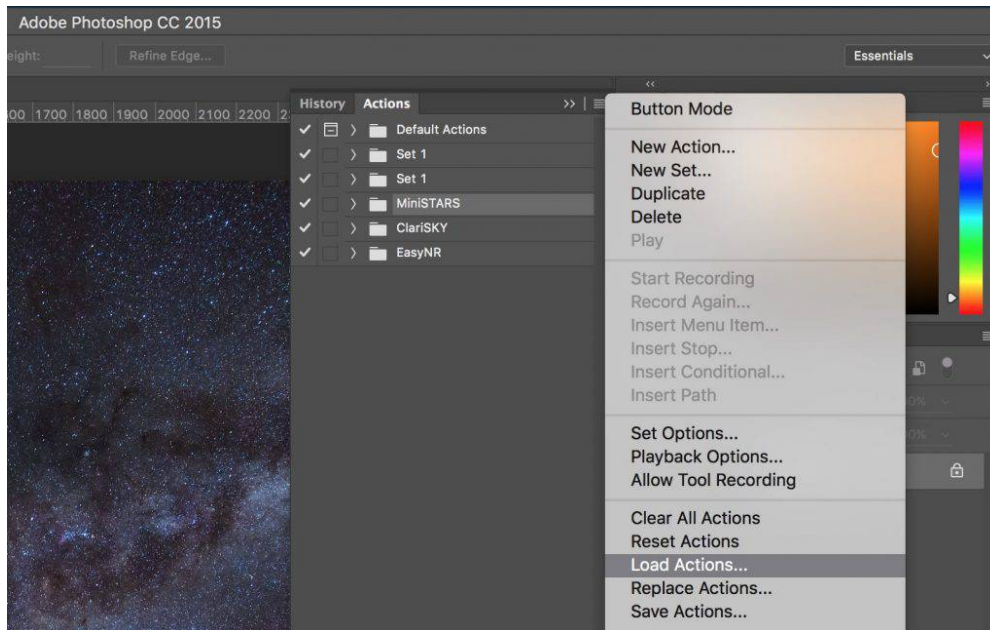

1. **Unzip** the Photoshop action pack *.zip* file you downloaded from us.

2. **Open Photoshop** and make sure the *Actions* panel is visible by ensuring *Window->Actions* is checked.
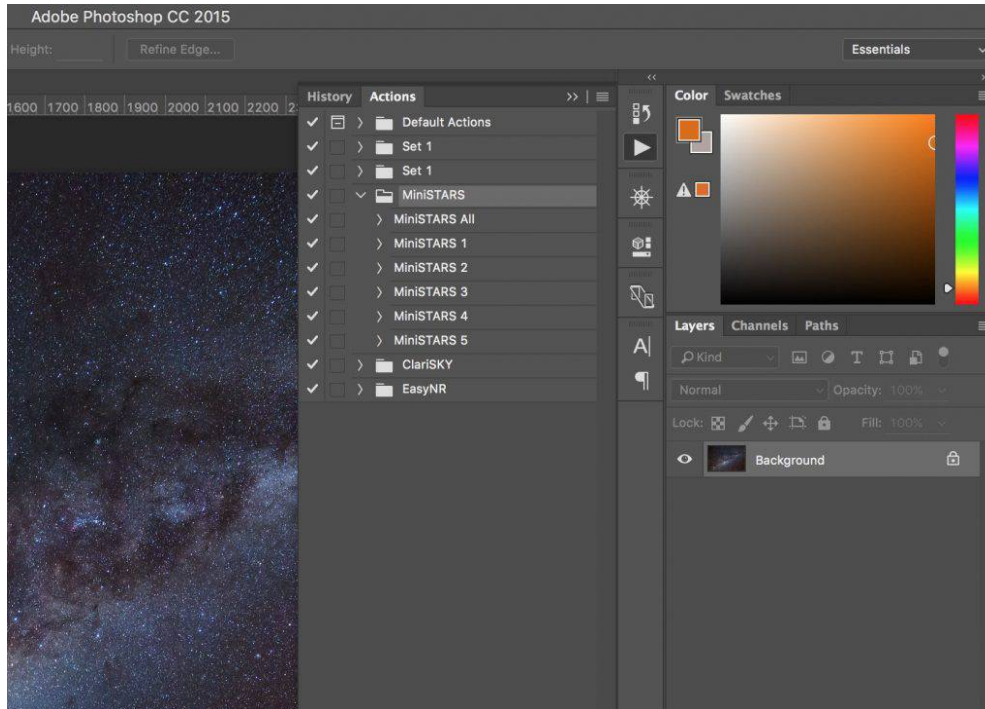

3. Open the drop-down menu for the *Actions* panel, and click *Load Actions...*

4. Navigate to the action pack folder you unzipped, and select the file with the *.atn* extension.

5. **Click** *Open* to load the action, and it will appear in the *Actions* panel.

6. Done!
